# Welcome Your AI-powered Assistant - The Pimcore Copilot

# The Pimcore Copilot

---

This dynamic helper is here to revolutionize how you interact with the Pimcore Platform! Discover the Pimcore Copilot, its features and capabilities!

We at Pimcore have been diligently working over the past months, setting every lever in motion to create you an extraordinary update. The moment has finally arrived to unveil something truly remarkable. From this very moment, you receive restless help from the newest addition to your virtual crew! Introducing the AI-driven Pimcore Copilot, your new, versatile, and adaptable assistant for the Pimcore Enterprise Edition.

Welcome to a new era of digital excellence with the AI-driven Pimcore Copilot.

# A built-in assistant designed to make your life easier

In the fast-paced world of content and data management, efficiency is king. Enter the Pimcore Copilot, a revolutionary addition to the Pimcore ecosystem. This dynamic helper assists you by providing tailored support for a wide range of tasks, making it easier to manage and take full advantage of the platform's possibilities.

## Features & capabilities of the Pimcore Copilot

From **context-sensitive actions to a powerful job execution engine**, let's dive right into the exceptional capabilities of this game-changing tool. Fair warning: You might get addicted to using it – it's just so smooth!

## Context-sensitive actions: effortless navigation

The Pimcore Copilot boasts an amazing feature: context sensitivity. Whether you're dealing with data objects, assets or custom reports, this assistant has your back. As you access it from different corners of Pimcore, it adjusts its functionalities to cater to your needs. In other words: It's your central command center within the Pimcore Platform – and it dynamically adapts to what you're doing!

Have you ever found yourself juggling multiple windows and tabs while managing your Pimcore data? It's a hassle – time-consuming, and prone to errors. **The Pimcore Copilot sidesteps this issue.** It opens in a separate window and offers you a seamless approach to interacting with Pimcore. You have to experience it because it's slick!

## Job execution engine: precision control

The Pimcore Copilot also introduces a job execution engine that puts you in full control of all your tasks. Managing long-running jobs has never been easier. You can **monitor ongoing tasks, track their progress, abort when necessary**, or even **restart already completed tasks**. The job execution engine takes the Copilot's capabilities to a whole new level. Whether you're dealing with data imports, updates, or resource-intensive tasks: This feature ensures full visibility and control. It's about more than just starting jobs; it's about managing them efficiently to ensure your platform operations run like clockwork. Tick tock!

# A built-in assistant designed to make your life easier

## Out-of-the-box convenience: pre-configured actions

### 1. Open custom report

Search and open custom reports directly from the Copilot. That's report management made easy.

### 2. Data objects variant generator

Create data object variants with added inputs – ideal for managing product variations or generating dynamic content.

### 3. Asset relation assignment

Automate image assignment to data objects based on specific metadata and say goodbye to tedious manual image management.

### 4. Text generation with prompts via OpenAI

Craft text content for data objects with AI-powered prompts. You can refine the results by interacting with the AI model. Content creation has never been more effortless.

Stay tuned for more actions to come in the main release!
